Allowable Subject Matter

1. Claims 1-8, 10-20 and 25-28 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a display generating device configured to generate signals for a graphical display device, comprising a processor for modifying an image by spotlighting a region of the image relative to its surroundings using a trackable spotlight which is slideably movable about the image, wherein an object within said surroundings is visible, wherein said image includes a plurality of objects and wherein said trackable spotlight is slideably movable within the image to move the spotlighted region to permit selection of one of the objects of the image that falls within the spotlighted region, wherein objects within said surroundings are also visible in addition to the object in the spotlighted region. These features are not found or suggested in the prior art.

The present invention is directed to wherein an object within said surroundings is visible, wherein said image includes a plurality of objects and wherein said trackable spotlight is slideably movable within the image to move the spotlighted region to permit selection of one of the objects of the image that falls within the spotlighted region, wherein objects within said surroundings are also visible in addition to the object in the spotlighted region. Each independent claim is identifies the uniquely distinct features "wherein said trackable spotlight is slideably movable within the image to move the spotlighted region to permit selection of one of the objects of the image

that falls within the spotlight region, wherein objects within said surroundings are also visible in

addition to the object in the spotlight region” The closest prior art Strasnick discloses a
